- No burning or stinging
- Loosens and thins mucus secretions to aid aspiration and removal of mucus from nose and sinuses

[LOCATE THIS PRODUCT IN A STORE NEAR YOU](#)[Click to return to the **PRODUCT CATEGORY PAGE**](#)**Aids in removal of mucus and
soothes baby's irritated nose**

Help relieve your baby's delicate nose with non-medicated Baby Ayr Saline Nose Spray/Drops. Baby Ayr restores moisture to dry, crusted and inflamed nasal membranes caused by colds. For babies with congested nose, Baby Ayr loosens and thins secretions to aid in the removal of mucus from the noses and sinuses. Parents will appreciate the unique bottle design which eases application by allowing either drops or spray. The special formula soothes baby's nose while avoiding the unpleasant side effects of decongestant drops or sprays.

INGREDIENTS

Sodium chloride 0.65% with monobasic potassium phosphate/sodium hydroxide buffer to prevent nasal irritation. Also contains the non-irritating antibacterial and antifungal preservatives disodium EDTA and benzalkonium chloride and is formulated with deionized water.

DIRECTIONS

For Infants: Put child on his/her back with head between your knees. Gently remove excess mucus with warm, moist cloth or cotton swab. With one hand, hold the baby's hands. With your other hand, put 2 to 6 drops in each nostril, taking care not to touch the dropper tip to hands, nose or nasal secretions. Have child remain on back for 1 to 2 minutes. Gently wipe the nose with a tissue or use a nasal aspirator or bulb syringe. The AYR dropper tip should be rinsed with hot water and wiped with a clean towel. Do not use the same bottle for other children.

For older children: Hold bottle upright. Give short, firm squeezes into each nostril. Take care not to aspirate nasal contents back into bottle.

PRECAUTIONS

The use of this dispenser by more than one person may spread infection.

AVAILABILITY

Baby Ayr® Saline Nasal Spray/Drops is available in 30 mL bottles.
